

MARCOS RODAS

Project Coordinator — Digital Platforms & AI Automation

Guatemala City | +502 40154866 | maodas00@gmail.com | [maodas.online](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Project Coordinator with 2+ years delivering digital platforms for USAID and U.S. Department of State-funded programs in Guatemala through IOM (UN Migration). I translate complex technical architectures into clear roadmaps for non-technical stakeholders, and I ship the software behind them. My background blends 15+ years of operations and commercial leadership with a deliberate pivot into full-stack development, AI automation, and cloud infrastructure — a combination built for environments where strategy and execution cannot be separated.

CORE COMPETENCIES

- **Project Coordination & Stakeholder Management:** Agile/Scrum, requirements translation, executive communication, cross-functional alignment with government and donor stakeholders (USAID, U.S. DoS).
- **AI & Automation:** Generative AI integration (OpenAI APIs), workflow automation (n8n, custom Node.js/Python tools), WhatsApp chatbots, document processing.
- **Full-Stack Development:** JavaScript (Node.js, React), TypeScript, Python, PHP, Astro, Tailwind, Git/GitHub Actions, REST APIs.
- **Data & BI:** SQL (relational & non-relational), Python for data analysis, Power BI, Tableau.
- **Cloud & Infrastructure:** Cost-efficient cloud architecture, Firebase, GCP, Docker, CI/CD, cybersecurity fundamentals.
- **Languages:** Spanish (native), English (professional working proficiency).

PROFESSIONAL EXPERIENCE

Project Coordinator — Digital Platforms *Jul 2024 – Present*

IOM (International Organization for Migration) — ROOTS Program

- Lead digital transformation initiatives for MINTRAB and IGM (Guatemalan government institutions) under USAID and U.S. Department of State funding, translating complex technical requirements into strategic roadmaps approved for national implementation.
- Built custom automation tools with Node.js, Python, and AI-driven workflows that eliminated critical bottlenecks across Finance, Procurement, and Programmatic departments.
- Ensured 100% project continuity in volatile regulatory environments by rapidly adapting development priorities to evolving government requirements.
- Architected cost-efficient cloud solutions prioritizing resource optimization and cybersecurity, reducing infrastructure overhead while maintaining compliance.
- Integrated generative AI into standard workflows to improve technical output quality and reduce delivery cycles.

Project Assistant *Aug 2023 – Jul 2024*

IOM (International Organization for Migration) — ROOTS Program

- Promoted to Project Coordinator after one year based on impact in digitizing manual workflows and improving inter-departmental coordination.
- Designed and implemented new internal data-handling protocols that significantly reduced application processing times.
- Created technical reports and data dashboards enabling program units to visualize milestones and KPIs in real time.

Operations ManagerFeb 2013 – Aug 2023

IDC Los Tres, S.A.

- Reduced shipping errors by 30% by re-engineering administrative, logistical, and HR workflows with data-driven continuous improvement.
- Lowered staff turnover and increased team productivity by designing and implementing leadership development programs.
- Maintained 100% operational uptime during peak-demand crises through strategic risk mitigation and end-to-end logistics management.
- Led multidisciplinary teams across administrative, logistical, and HR functions, transitioning the operation from manual to data-driven systems.

Regional Sales SupervisorApr 2007 – Dec 2012

Calzado Matrix de Guatemala

- Consistently exceeded regional revenue targets of Q2 million/month across 22 branches through data-driven sales planning tailored to local markets.
- Increased individual store profitability (up to Q250,000/month) through performance coaching and high-impact customer service training.
- Mentored branch managers and standardized sales processes across urban and rural regions.

SELECTED PROJECTS

- **Nutrissé GT — Digital Ecosystem & Automation** (In Progress): End-to-end platform for a nutrition clinic including landing page, e-commerce, multi-channel social funnel, WhatsApp automation, and appointment scheduling. Stack: Next.js, Firebase, n8n, WhatsApp Business API.
- **WhatsApp AI Chatbot** — Customer service automation with OpenAI-powered responses, human handoff, and admin monitoring panel. Stack: Python, OpenAI, Docker, Celery, PostgreSQL.
- **Beneficiary Mass Messaging Platform** — Segmented communication system with real-time delivery tracking and reporting for social programs. Stack: Node.js, Twilio API, Render.
- **Captive WiFi Portal** — User data capture and authentication with real-time analytics and automated access code generation. Stack: Node.js, Express, MongoDB.

EDUCATION

- **Associate Degree in Software Development** — Universidad Galileo, Guatemala
- **Industrial Bachelor / Computer Technician** — Instituto Tecnológico Federico Taylor
- **B.S. in Administrative Engineering** — Universidad Galileo (5th semester, currently paused)

PROFESSIONAL CERTIFICATIONS

- **Google Project Management Professional Certificate** — Coursera
- **Front-End Developer** — Oracle Next Education / Alura
- **Google Data Analytics Professional Certificate** — Coursera (in progress)
